CAREER OBJECTIVE & STUDY ABROAD GOAL
Final-year B.Tech Computer Science and Engineering student (CGPA: 8.2/10.0) seeking admission and merit/need-based scholarship funding for a Master's program in Artificial Intelligence, Machine Learning, or Computer Vision in Canada, Germany, or Singapore (2027 Intake). Coming from a middle-class family in Jalandhar, I require tuition waivers, teaching/research assistantships, or international fellowships.

EDUCATION
Lovely Professional University (LPU), Phagwara, Punjab, India
Bachelor of Technology (B.Tech) in Computer Science & Engineering (2023 - 2027)
Current CGPA: 8.20 / 10.0

TECHNICAL SKILLS
- Languages: Python, C++, SQL, JavaScript
- AI/ML Frameworks: PyTorch, TensorFlow, Hugging Face Transformers, LangChain, scikit-learn, OpenCV
- Backend & MLOps: FastAPI, Docker, Git, Linux, Rest APIs, MongoDB, PostgreSQL

KEY AI & ENGINEERING PROJECTS
1. MediScan-RAG: Clinical Diagnostic Assistant using Multimodal RAG
  - Built an end-to-end Retrieval-Augmented Generation pipeline using LangChain, ChromaDB, and Llama-3.
  - Reduced hallucination rates on medical QA datasets by 28% via hybrid dense+sparse retrieval (BM25 + FAISS).

2. CropGuard-CV: Real-Time Plant Disease Detection for Punjab Farmers
  - Trained a lightweight MobileNetV3 and YOLOv8 model in PyTorch on 18,000 leaf images with 94.6% accuracy.
  - Deployed as a quantized ONNX model served via FastAPI for low-end Android devices.

3. FinSentiment-BERT: Financial News Sentiment Analyzer
  - Fine-tuned FinBERT using LoRA (PEFT) on Indian stock market news headlines to predict intraday volatility.

ACHIEVEMENTS & EXTRACURRICULARS
- Winner (First Runner-Up), Smart Punjab AI Hackathon 2025 (out of 120 teams).
- Solved 400+ Data Structures and Algorithms problems on LeetCode and Codeforces.
- Student Coordinator, AI & Robotics Club, Jalandhar Tech Chapter.
